

# eCRIS v2.1 Change Log

- Updated the “Search by” field in our screens to be more compatible with modern web browsers. You no longer have to use Internet Explorer in Compatibility Mode.
- Added an Aggregate column to the Search By popup for contributors. This will assist in selecting the correct contributor in situations where the user has mistakenly entered the same contributor as a “new contributor” multiple times.
- Added watermarks to some of fields to assist in guiding the user to use the Search By field when appropriate. For example on Itemized Contributions from Individuals, we added “type existing contributor here” to the Search By field and “type new contributor here” to the last name field.
